eSafety Label - Action Plan

Action plan submitted by Mehmet Sıddık ALACA for Altınova İlkokulu - 17.12.2022 @ 19:35:06

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- It is good practice that your ICT services are regularly reviewed, updated and removed if no longer in use.

- You urgently need to get virus protection for devices that need to be protected on the school network and adopt consistent school-wide practice on virus protection. Just one infected device can contaminate the school's whole network and certain types of virus can even save illegal content to your server.
  You should also include a paragraph on virus protection in both your school policy and your Acceptable Use Policy, and ensure that staff and pupils rigorously apply school guidelines. Check out the fact sheet on Protecting your devices against malware at www.esafetylabel.eu/group/community/protecting-your-devices-against-malware.

Pupil and staff access to technology

- You need to provide different WiFi networks for different purposes within the school, e.g. a secure network for staff /core business, a guest network for visitors and casual use.
  Staff and pupil use of their own equipment on the school network needs to be addressed in an Acceptable Use Policy so that users are clear about which networks they should use and why. Your Acceptable Use Policy needs to include clear guidance about which activities are permitted while on the school network, and what is not allowed.

- Consider whether banning mobile devices is a rule that is fit for purpose and if your school might want to allow digital devices for some class activities.You could develop as part of your Acceptable Use Policy a section on how digital technologies can and cannot be used in the classroom; see the fact sheet on Using Mobile Phones at School (www.esafetylabel.eu/group/community/using-mobile-device-in-schools).

Data protection

- It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.

Software licensing

- Ensure that all staff are aware of the procedure for purchasing new software and that all licenses are appropriate for the number of pupils and staff that will be using them. The End-user license agreement section in Wikipedia will provide useful information for understanding terms and conditions and comparing software agreements.

- You need to make sure that all the software in your school is legally licensed and that copies of the licences are held centrally. You also need to check with whoever supports your IT systems that the software will not compromise system security. Your school should develop a clear policy for software acquisition and it is good practice to centralise this process wherever possible.

- Keeping track of installed software and its licenses is a crucial task in order to avoid expired software licenses and to remain legal within the school ICT infrastructure. Ensure there is is an ICT responsible who will be able to produce an overview at any given moment.

- Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.

IT Management

- It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.

Policy

Acceptable Use Policy (AUP)

- It is good that you have an Acceptable Use Policy (AUP) for pupils. You should now amend the AUP to include staff and the wider community. To ensure that your revised AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetylabel.eu/group/community/acceptable-use-policy-aup-.

- School policies and procedures are essential to ensure a smooth operation within a school and that all school members follow the same set of rules and guidelines. Ensure that school policies exist and that all school members are aware of them. You can find more information on this in the of the eSafety Label website.

Reporting and Incident-Handling

- Check that your School Policy includes all necessary information for teachers about handling issues when pupils knowingly or even inadvertently access illegal or offensive material online by going to the guidance set out by the teachtoday.de/en website (tinyurl.com/9j86v84). If such incidents arise in your school, make sure you anonymously fill out the eSafety Label Incident handling form (www.esafetylabel.eu/group/teacher/incident-handling) so that other schools can benefit from your experience.

Staff policy

- Ensure that all staff, including new members of staff, are aware of the policy concerning online conduct. This should be a topic that is regularly discussed at staff meetings and clearly communicated in the School Policy, and to staff and pupils in the Acceptable Use Policy. Regularly review and update both documents as necessary.

- In your school user accounts are adjusted within a weeks delay if the role of staff or pupil changes. Investigate if this process could be optimised. The quicker that unused accounts are deactivated/adjusted, the less risk of misuse.

- New technologies, such as smartphones or other mobile devices bring a new set of risks with them. Ensure that your teachers are aware of those. This way they can avoid the pitfalls when using the devices and also pass the knowledge onto the pupils.

Pupil practice/behaviour

- Your school partly has a school wide approach of positive and negative consequences for pupil behaviour. This is a good start, make sure that the policy and associated hierarchy applies to all on- and offline issues and is shared widely and re-visited by all staff and pupils at least annually.

- You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your My school area so that other schools can benefit from your experience.

School presence online

- While your school has an online presence, pupils cannot take part in shaping it. Explore if there could be a way to involve pupils, maybe as part of a digital council. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.

- Review the policy on taking photographs of, and by, pupils, parents and staff and check that it reflects any recent developments. Ideally, the policy should focus on behaviour rather than specific technologies. The fact sheet on Taking and publishing photos and videos at school (www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) will provide a good starting point.

Practice

Management of eSafety

- It is good that all staff in your school are responsible for eSafety. However, it is good practice to appoint a person who will have overall responsibility for eSafety issues to provide the focus needed. Ideally this should be someone from the senior leadership team. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at www.esafetylabel.eu/group/teacher/incident-handling.

eSafety in the curriculum

- It is commendable that you are able to provide an eSafety curriculum that keeps up with emerging issues. Continue to make use of new resources as they are made available. Can you upload to your school profile an outline of how you design the curriculum and links to some of the resources you use – this would be most helpful for other schools.

- It is good that these issues have been included in the eSafety curriculum. It is a good idea to regularly review the issues which are being covered by your eSafety education in order to ensure that new and emerging issues are covered.

- It is good that eSafety is taught as part of the curriculum in your school. Ensure that all staff are delivering eSafety education where appropriate throughout the curriculum and not just through ICT or Personal Social and Health lessons. You/your staff may find some useful ideas and resources in the fact sheet Embedding eSafety in the curriculum at www.esafetylabel.eu/group/community/embedding-online-safety-in-curriculum.

- It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions need to be read to fully understand contractual conditions. This can also concern aspects of data privacy. Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the My school area.

- It is good that sexting has been integrated into wider online safety education across the school. Are you able to assess the impact of this education? Does it help pupils to modify their behaviours? How do you know?

Extra curricular activities

- Try to develop further the engagement of pupils in peer mentoring and provide them with more opportunities to share their thoughts and understanding with their peers. Also check out the resource section of the eSafety Label portal to get further ideas and resources.

Sources of support

- Dobro je, da staršem nudite podporo v zvezi z e-varnostjo, ko si to želijo. Premislite, ali bi bilo dobro vse starše redno obveščati prek spletne strani ali prek povezav v šolskem e-glasilu. Morda imate lahko tudi roditeljski sestanek. Poglejte si smernice o informacijah za starše na www.esafetylabel.eu/group/community/information-for-parents, kjer boste našli gradiva, ki jih lahko posredujete staršem, in ideje, ki jih lahko uporabite na roditeljskih sestankih.

Staff training

- All teachers should be able to recognise signs of cyberbullying and be aware on how to best proceed. Make sure that your teachers are regularly trained bearing in mind the rapid changes of new technology. Also check the eSafety fact sheet on Cyberbullying at www.esafetylabel.eu/group/community/cyberbullying.

- Although staff in your school do not receive training on eSafety, they need to be regularly updated about emerging trends. Consider a needs-analysis to determine what different staff require from their training and

consult the eSafety Label portal to see suggestions for training courses at www.esafetylabel.eu/group/community/suggestions-for-online-training-courses.

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the Upload evidence on the My school area section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the Forum, and your reporting of incidents on the template provided are all also taken into account.
